CART

FOR UTILITY AND OTHER OBJECT DETECTION

The RAMAC/GPR™ Cart

The Ramac/GPR™ Cart is an accessory to the RAMAC/GPR 500MHz shielded antenna system. This ergonomically designed trolley supports all you need for an easy GPR survey. A distance encoder is mounted on one of the wheels for continuous triggering of the system. The RAMAC/GPR Cart can be folded for easy transport.

Technical specifications

- Dimensions: 75 x 120 x 40 cm (30 x 47 x 16 in) (folded)
- Weight: 7 kg (16 lb)
- Material: fiberglass armoured plastic

Also available with the RAMAC/GPR Cart and visible on the profiles created with the Ground Vision™ software is a reverse cursor. This function allows backing with the

system to the exact location of the detected object for easy marking on the spot, in real time, without stopping the recording. Going forward again will enable you to carry on recording from the point where you stopped.

Contact us now to have the RAMAC/GPR™ Cart added to your 500MHz system.
